

CASE STUDY **DELHI AIRPORT**

ELEVATING PRIVACY STYLISHLY

Location : Delhi, India

Sector : Airport

Product Featured : Matte White Film

CHALLENGE

Operational Privacy in a World-Class, Glass-Dominant Airport

While the design of the Delhi Airport showcases modern transparency through glass-heavy interiors, it also raised concerns in areas where privacy and discretion were critical and hence security needed to be boosted.

SOLUTION

Matt White Film: The Perfect Balance of Privacy and Design Minimalism

Selected to deliver both functionality and finish

RESULTS AND BENEFITS

Offices and corridors were fully exposed through clear glass partitions, risking visual breach

The soft, frosted matte white finish provided instant privacy while complementing the natural sleek design language of the terminals

Complete Visual Privacy— Critical back-end now shielded from open view, improving security

Passenger holding and VIP lounges needed visual shielding from public view, without feeling closed off

Enabled **light diffusion without complete blackout**—preserving brightness while eliminating direct sightlines

Design Continuity Maintained—Frosted look beautifully integrated with palette

Harsh daylight glare and reflections impaired visibility & comfort-transit zones

The film also provided **protection from glare, scratches, and UV exposure**, ensuring long-term clarity and durability

Durable Scratch-resistant Surface—Maintains pristine appearance

Quick Clean Execution—Installed with no mess, no delay, no operational downtime
